

KnockKey™

OUTLOCKS' KnockKey™ is a light, matchbox-sized device that is used for transmitting the encrypted knocking code to the lock. The KnockKey™ comes with a back-lit eleven button key pad, is highly durable, and powered by a long lasting lithium battery. Each KnockKey™ comes with a unique serial number to identify it when interacting with the lock. Additional features include constant back light for night time use, and low battery warning.

Applications:

Hand held key used for unlocking OUTLOCKS' wide range of locking units.

Technical Specifications:
