

DISCOVER ENHANCED FEATURES IN OUR LATEST LNI ACCESS MANAGEMENT SOFTWARE RELEASE!

We are excited to announce the release of the newest version of OUTLOCKS' Lock Management Software, bringing you an array of exciting features and enhancements. This release is designed to provide you with even more flexibility and control over your access management processes.

SYSTEM DASHBOARD

Centralized Control and Monitoring

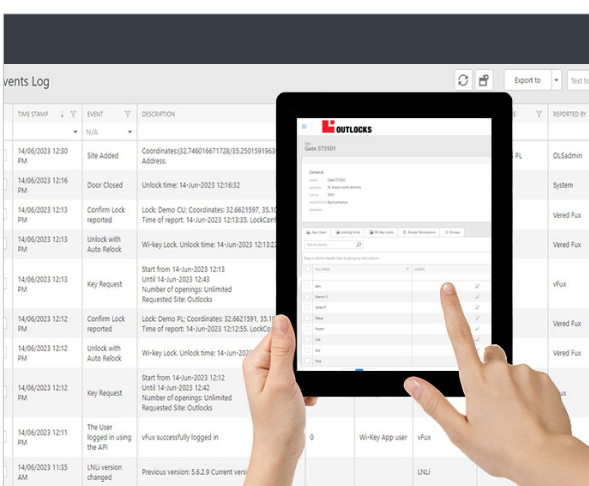

Gain complete control over your operations with our revamped system dashboard. It features a live map, status charts and important alerts, ensuring you have a real-time overview of visits to your sites secured with OUTLOCKS' locks. From the centralized control hub, you can optimize security measures and streamline your access management processes, without ever leaving your office.

NEW ACCESS AUTHORIZATION VIEWS

Easily Monitor Access Clearances

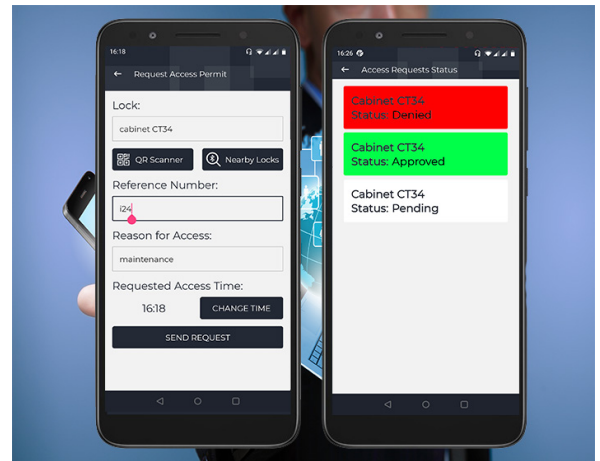

We've introduced new views that provide you with comprehensive insights into access permissions. At any given time, authorized managers can now effortlessly verify who has access to a site, and individuals can view the sites they are authorized to access. These registers offer a clear and concise overview, enabling you to review, manage and change access permissions efficiently, and make informed decisions effectively and with ease.

AD-HOC PERMIT REQUEST

Convenient Access Whenever You Need It

We understand the importance of flexibility in managing access to your premises and remote sites. Whether it's emergency maintenance work or an unexpected change in personnel, users can initiate a permit request at any time, ensuring a seamless and hassle-free access experience. Say goodbye to unnecessary delays and welcome the convenience of instant access without compromising security.

IMPROVED API CAPABILITIES

Simplify System Integration

We made it easier to integrate OUTLOCKS' Access Management System with your existing security system, using our API. We have simplified implementation by improving and creating new API calls, reducing the need to poll for events, and introducing an events listening mechanism. Another new API feature is the Universal Messaging Interface, which allows you to integrate any service provider's text messaging services.

SECURITY AND STABILITY

Our Priority

In addition to these new features, OUTLOCKS' new version of its Lock Management Software includes significant improvements in security and stability. We are committed to providing you with a robust and reliable access control solution that safeguards your premises effectively. Rest assured that your Lock Management System is fortified with the latest advancements to protect against potential threats and ensure uninterrupted operations.

To experience these powerful features and take advantage of the enhanced capabilities of our Access Management Software, we invite you to reach out to our sales team at sales@outlocks.com.

OUTLOCKS' dedicated support team is also available to address any inquiries or aid as needed at support@outlocks.com.

We appreciate your continued trust and support in our locking and access control solutions. Together, let's elevate your access management to new heights!
